

Award Winning and #1 Rated Dock-N-Talk™

The world's first truly universal cell phone docking station and charger now supports over **1800** cell phone models!

The patented Dock-N-Talk™ allows you to dock your cell phone and use your normal corded or cordless phones to make and receive your cell phone calls. Effectively turns your wireless service into "wired" service while docked. The Dock-N-Talk™ can be used in your home, office, dorm room, weekend home, boat, RV or any other location where cell service is available.

- The Dock-N-Talk™ can pair with up to 8 Bluetooth Enabled cell phones for immediate connection with the new Bluetooth Module(BT02)!
- Make and receive cell phone calls using Dock-N-Talk™ with normal wireline cordless or corded telephones;
- Get better reception by docking your cell phone in your "hot spot" for strongest signal and talk anywhere in your home;
- Gives consumers the choice of cell phone service for the home or office with the same functionality as wireline service;
- Universal design supports an unlimited number of handsets with currently over 1800 cell phone models supported including some of the most popular phones from Nokia, Sony Ericsson, Motorola, Samsung, LG, Palm Treo, RIM Blackberry, Siemens, and more;
- Use local number portability to move your land line number to a cell phone and keep using your land line phones;
- Charges your cell phone while docked ensuring your cell phone is always fully charged when using with a cable connection;
- Have the convenience and audio quality of a full-sized handset, speakerphone or headset for extended calls;
- Utilizes and transfers features such as voice recognition, one-touch voicemail dialback and SMS message alerts from your cell phone;
- Place your cell phone in your best area for cell phone reception and use regular corded or cordless phones throughout the house;
- Use the free unlimited nights, weekends and mobile to mobile calling plans to their fullest while fully utilizing unused peak minutes;
- Bluetooth Module interfaces wirelessly between the Dock-N-Talk™ and cell phone with no need for a cable;
- Sends Caller ID and Visual Message Alert from cell phone to compatible home phones;
- Switch an active call seamlessly from cell phone to home phone (and vice versa);
- Eliminates cell phone radiation for extended conversations or extensive calling;
- Docking Stations will also be available integrated into a telephone with the Enterprise telephone or also with a full wireline telephone built-in, the Unity telephone.
